

**Q & A For Industrial Park South Re-Platting Request for Proposals
Due Date: 8/19/14, 1:30 PM**

1. Who did the original plat? Are those drawings available for consultants?

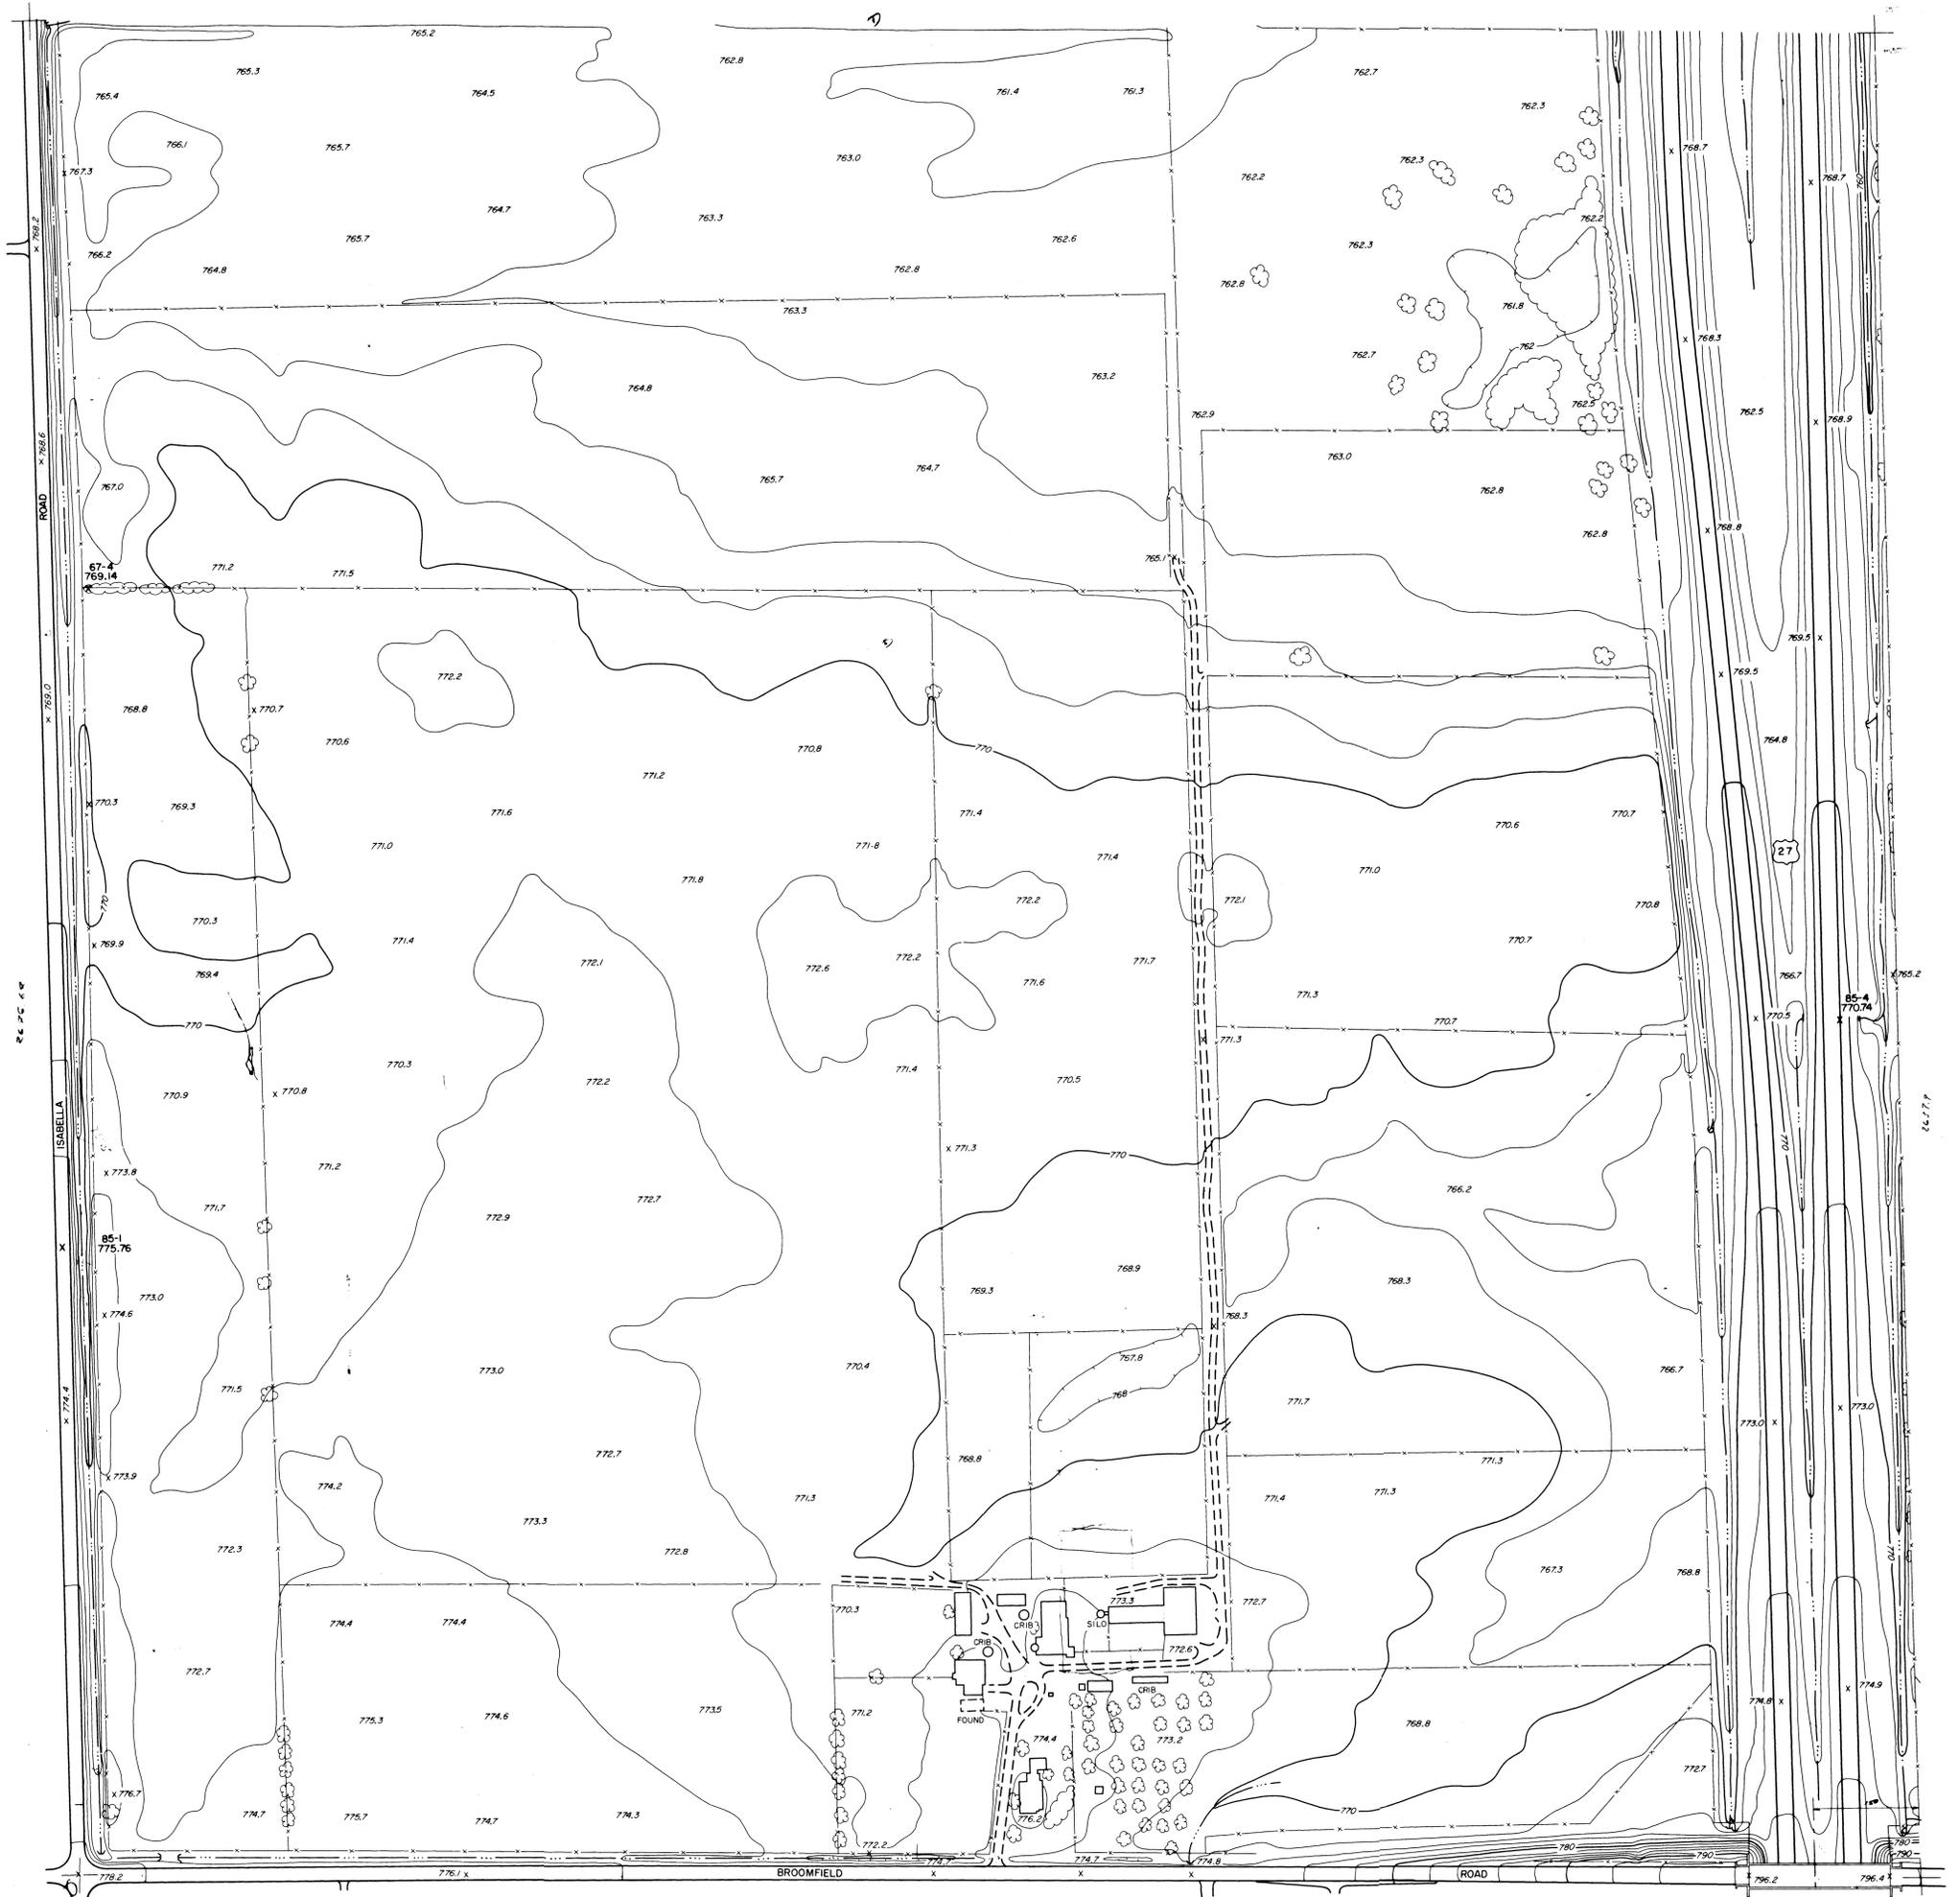

The final plat and the one to be used for this project was prepared and recorded by Lapham Associates (Clare, West Branch). The plat map of the park can be accessed using the following link: http://www.dleg.state.mi.us/platmaps/dt_image.asp?BCC_SUBINDEX=65836

2. Do we have any 1 or 2' contours available for that area?

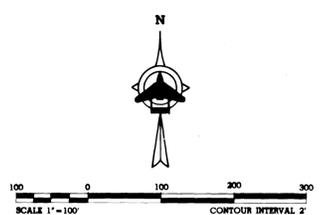

A map of the industrial park showing two foot contour intervals is available and is included as part of this section.

3. Does the project have to involve a re-platting process or is the City open to other approaches that would accomplish the same goals for both the property owners and the City?

Other reasonable approaches will be considered as long as they 1) comply with state and local law, 2) allows the property owners to divide and sell off portions of their existing property in a manner that does not preclude a similar opportunity and reasonable use by other property owners in the park, and 3) creates additional buildable lots for future development.
